## Wallsend Children's Community

Wallsend Children's Community is a initiative established to work across Wallsend to support organisations, institutions, and statutory services working for and on behalf of the children, young people and families in NE28. Our vision is to change the odds for the poorest such that by 2025, Wallsend will be an area where all local children and young people have access to exactly the same high-quality chances as those in more advantaged areas. We bring partnerships and collaborations together to achieve more and better together. We bring communities, children and young people together to help shape services to best suit their needs and aspirations. We support our partners to evidence outcomes and impact.
