## Rainbow Trust Children's Charity

Rainbow Trust Children's Charity supports seriously ill children and their families in the family home and local community. Families who have a child or young person up to the age of 18 with a life threatening or terminal condition (for example cancer, some neurological conditions, babies in neonatal intensive care) are eligible and referrals can come from any source. We enable families to manage everyday life while caring for a sick child and to make the most of time together; providing expert, practical and emotional support via a Family Support Worker. Rainbow Trust's support can include short breaks from caring, family activity days, drop-in groups, support with hospital visits, including transport to and from appointments, support for siblings and bereavement support.

To find out more about the services available in your area, please contact Fiona Walker, tel 0191 300 1601. Support is provided in family homes and in the community, with drop-in groups at various times and venues. The address below is administrative only.
