

## Beacon Films CIC

Beacon Films CIC supports filmmakers with learning disabilities, autism and additional needs to make and showcase great film and music productions and develop valuable creative skills. Our members' work is screened all over the world, challenging audiences and receiving praise from across the creative sectors. We run a wide range of filmmaking projects throughout the year for young people and adults aged 16 upwards who are interested in film and music. No experience is necessary, just an enthusiasm to take part and an interest in making films.
