Northern Animal Assisted Therapies & Activities

Northern Animal Assisted Therapies and Activities (NAATA) is a community interest company. Our team of specially reared animals can offer fun, interest, motivation and comfort to people of all ages with a variety of needs. Bespoke activities are devised and delivered by our Speech and Language Therapist who specialises in supporting young children with developmental difficulties, speech, language and communication needs. We aim to support and develop the skills of the adults caring for these children (families, Early Years professionals, school staff and other organisations). Working together we can build capacity in our communities, develop outstanding practices in settings and services and boost outcomes in a way that's fun and effective.
