Lone alarms

We provide alarms to lone workers, mobile workers, and anybody else who wants to feel protected and reassured. All of our alarm users receive a 24/7 service from our Monitoring Team. Every member of the team has had extensive training to provide the best possible service and respond to a wide range of emergency situations. What's more, the TSA has given our Monitoring Centre the highest possible accreditation. The TSA (Telecare Services Association) is the industry and standards body for Telecare and Telehealth in the UK. With just one push of your alarm button, you can get help when you need it most from our expert Monitoring Team
