OK Rehab

OK Rehab specializes in addiction treatment. This treatment is available via both inpatient and outpatient treatment providers. We also work with clinics that are able to facilitate treatment taking place in your own home and are able to provide professional intervention and home detoxification.

At OK Rehab, our aim is to help individuals break free from the shackles of addiction and find a treatment that's ideally suited to their needs. This treatment is applicable to drug addiction, alcoholism, and process/behavioural addictions.

Many of the treatments we may recommend take place at residential rehab clinics. We have partnered with over 140 clinics of this nature across the UK and abroad. These clinics offer standalone detoxification services, or alternatively, you may combine detox with extended rehabilitation.
