Pristine Cleaning

Pristine Cleaning is a different type of cleaning company. We really care about the quality and standard of clean you receive from us, whether you want us to clean your home, office, commercial premises or a deep clean.

We understand that it's actually the finer details that make a clean amazing. So we pay attention to this, to the point that we even take the time to smarten up anything we move during the clean. Something as simple as straightening papers on a desk to having your sauce bottles facing the same way gives you that Wow factor after we have left.

We want to take cleaning to the next level and make you feel amazed at how good your home/office/premises looks.

Working for over 6 years in the professional cleaning sector we have really understood what makes you happy!

With competitive rates and experience across commercial, domestic and deep cleaning services we know what you need from your cleaning service provider.

Call our team today for your free quote, and if you are not quite sure what you exactly need, why not organise a site visit so we can advise you on what you need for a Pristine Clean!.
